

TIMER APP

Timer App is a simple and user-friendly timer application, that allows users to set countdown timers and provides notification alerts when the timer finishes. It's designed with clean UI and easy functionality

- **Many timer apps are complicated or filled with ads.**
- **Users need a minimal and distraction-free timer.**

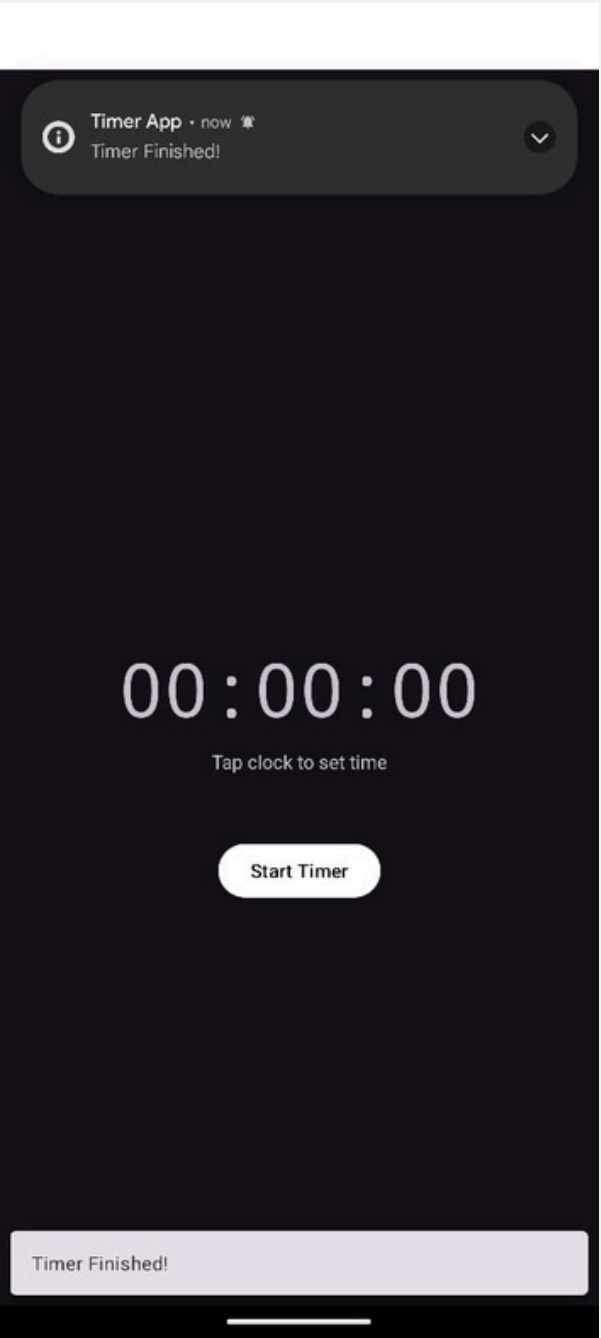

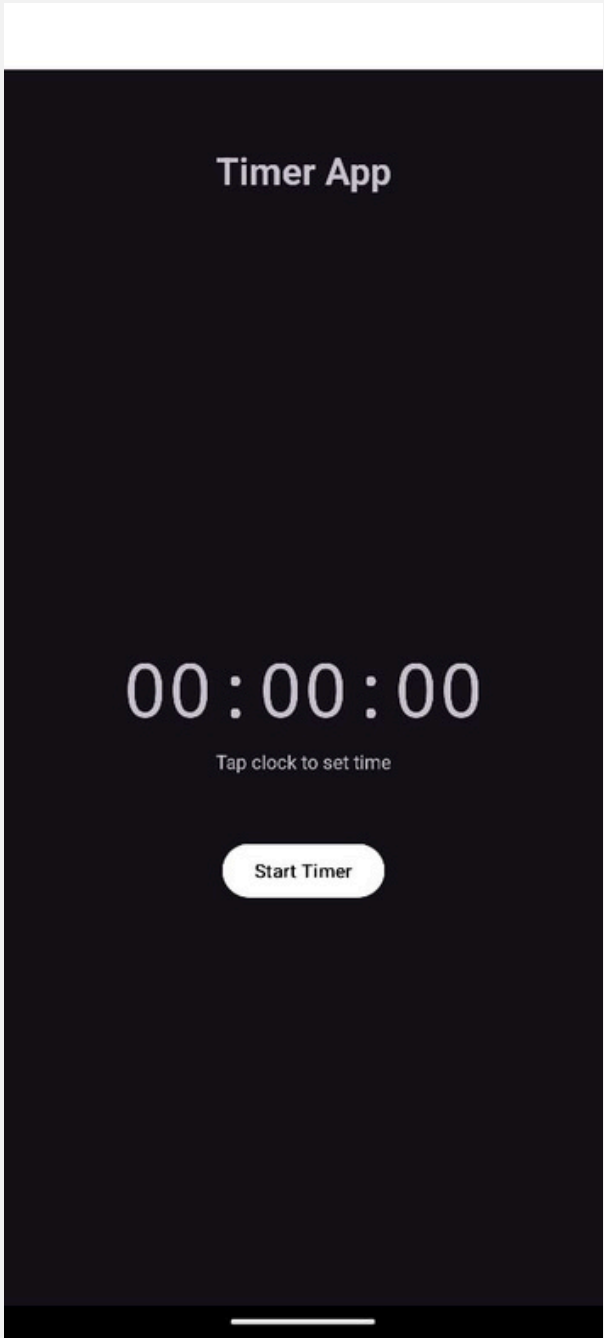

So we decided to create a lightweight app especially for students who can use it for studying

What we needed:

- **Clean, minimal timer interface.**
- **Easy to set and start timer.**
- **Provide notification when timer ends.**
- **Responsive layout for all screen sizes.**
- **Lightweight and fast app.**

Code Explained:

Result

Future Work:
**Adding challenges to ensure user deactivates
the alarm**
Creating a streak/reward program

The background features a light gray grid pattern. A large, solid light gray rectangle is centered on the page. In the corners, there are black geometric shapes: a square in the top-left, a square in the top-right, a square in the bottom-left, and a square in the bottom-right. Each of these black squares has three vertical white lines of varying heights on its left side.
